

### Installation Instructions

1. Attach the clamps to the bottom of the glass (approximately 1/4 of the overall width from the side edges).
2. Hold the glass shield at the desired position on the top surface and mark the installation holes for the clamps.
3. Drill the holes and mount the clamps with appropriate fasteners (not included).
4. Slide the flange covers over the clamps.
5. Using gaskets, grommets, and setting blocks for protection, set the glass in the clamps and secure with the supplied screws.
